IMY 220
Practical 7
Debugging React

Due: Friday 18 October @ 8:30

The submission instructions are available on ClickUP. Any deviation from these instructions will cause 10% deduction from your mark.

Instructions

- Download *Practical7.zip* from ClickUP. This ZIP file contains an incomplete React project with issues.
- Your task is to go through the React project, using debugging tools like the console to get the project working and fix all the issues.
- During the marking process, you will need to show us all instances of issues that you fixed and explain why it is an issue and how you fixed it.
- There are **16** errors/instances of incomplete/broken code that you will need to rectify.
- You have been provided with a *memo.zip* to aid you in the final functionality that would be required for the application.

Submission Files

- All files excluding your *node_modules* folder.
- A TXT file containing the files, lines and errors that you fixed.

Submission Instructions

- Include your student details in all files worked on.
- ZIP all submission files (using a tool like 7Zip or WinRar) into a ZIP file called *uXXXXXXXX-P7.zip,* where uXXXXXXXX is your student number.
- Submit your ZIP file before 8:30 to avoid any late submissions.
